

Endangered Species

The fifth Anna Pigeon mystery In the midst of a dangerously dry season, national park ranger Anna Pigeon has been posted to Cumberland Island off the Georgia coast for a monotonous, twenty-one-day fire watch. But her boredom is short-lived, for this remote and marshy place is breeding ground to more than just the imperiled Loggerhead turtle; it also spawns eccentricity and secrets, greed, suspicion and murder. A small plane crashes into the palmetto thickets nearby. Anna and her crew arrive in time to control the blaze, but too late to save the pilot and his passenger, Cumberlands sole law enforcement ranger. When the cause of the accident is determined to be sabotage, Anna becomes entangled in an investigation that threatens to upset the very delicate balance of this fragile ecological preserve. For she is precariously close to exposing dark, clandestine crimes, both old and new, that someone has worked very diligently to conceal and which make Anna Pigeon the most endangered creature on the island.

The number of endangered and threatened species changes as we add or remove species from the list. See how many are currently listed. International Union for Conservation of Nature and Natural Resources. IUCN Species Survival Commission Arizona State University Birdlife International BGCIA An endangered species is a species which has been categorized as very likely to become extinct. Endangered (EN), as categorized by the International Union for Conservation of Nature (IUCN) Red List, is the second most severe conservation status for wild populations in the IUCNs schema after Critically Endangered (CR). Critically Endangered. Black Rhinoceros. Bornean Orang-utan. Borneo Elephant. Cottontop Tamarin. Cross River Gorilla. Eastern Gorilla. Gharial. Javan Rhinoceros.
