

# Using Computers and Applications Software: Featuring Lotus, dBase III/III Plus and WORDPERFECT (The Ingalsbe business applications software textbook series)

The Ingalsbe Business Applications Software Textbook Series consists of texts/tutorials offering hands-on coverage of the most popular applications software packages for IBM and compatible microcomputers. In each volume, a modular organization presents applications software concepts in a standardized format that includes: introduction and key terms; tutorial exercises; operation and command summary; advanced topics; a hints and hazards section as well as study problems and questions. These are followed by background discussion materials and numerous practice exercises. The proven, step-by-step tutorials get students at the computer, and learning functions and commands, almost immediately - with minimal instructor involvement.
